

ZOUBA

HTML5 Public Transport App

The App

Zouba is the only app that you need for all your public transport needs! You can save your favorite routes, so you know what time to leave home to get to that bus to work. Best of all thanks to the awesome power of HTML5 the app works the same on your mobile phone, tablet or desktop

Why HTML5?

We wanted to make sure that the app would look and feel the same on any platform. Combined with great support for touch-enabled devices makes HTML5 the obvious choice!
